

2018

**Agriculture Bingo Parent Instructions**

Your child's class recently participated in our 2018 PA Ag Literacy Week. A member of Pennsylvania's agricultural community visited their classroom to share about how farms provide us with the foods we eat. Through the book *Tyler Makes Pancakes*, your child learned about where we get the ingredients for pancakes. This bingo game was used to discover the sources of other popular food ingredients...that all start on the **FARM!**

We invite you to reuse the bingo card your child received to play this game with them to reinforce where their food comes from!

***Preparation:***

- 1) Print the Agriculture Bingo Calling Cards available on our website ([www.pfb.com/ALWbingocards](http://www.pfb.com/ALWbingocards))
- 2) Cut apart the Agriculture Bingo Calling Cards and place in a container from which you can pull them during the game.

***Playing:***

- 1) Have your child place their bingo card so they can see the bingo grid with agricultural commodity icons.
- 2) Pull one of the Agriculture Bingo Calling Cards you previously cut out from the container.
- 3) Read the message on the card that names a food and an ingredient for that food.
- 4) Have your child try to find the plant or animal from the farm that provides that ingredient on their bingo card, then pull up that tab,
- 5) As we often get more than one ingredient from plants and animals on the farm, sometimes the ingredient behind the plant or animal icon will not match the needed ingredient. If the ingredient behind the tab matches, they should fold that tab open. If the ingredient behind the tab does not match, they will need to close the tab.
- 6) Continue pulling Agriculture Bingo Calling Cards until your child gets bingo (horizontally or vertically). The five ingredients for bingo should be the five ingredients for one of the following foods:
  - Pancakes
  - Tacos
  - Chicken Sandwich
  - Pizza
  - Salad
  - Bacon Cheeseburger
  - Spaghetti
  - Grilled Cheese & Tomato Soup
